

**CUSTOMER'S THREADING CHART  
FOR  
401, 403, 404, 500, 503 Machines**

**Return this chart with machine.**

The Knit Kit was introduced around 1975, and was for all the Slant-O-Matic series. It consisted of an improved hook & replacement bushing. The improved hook allow for the repairman to set the needle a little closer to the hook point, and help eliminate skip stitches. Plus it allow the machine to handle the newer polyester threads that were coming onto the market with more ease.
